

## MISSION STATEMENT

Lead and manage a highly innovative and effective information services organization that leverages employee talent, technologies, best practices, and collaboration to create productive, efficient, and robust administrative services and support for a premiere institution.

## SAMPLING OF ACCOMPLISHMENTS

- Challenged with the turnaround of a company after years of losses, declining sales, I Initiated the Linux-Oracle project which significantly cut MIS budget by reengineering old legacy applications. Oracle ERP and Oracle DB applications were moved from Thu64 Unix/Compaq Alpha platform to Linux Red Hat AS 3.0/Intel platform.
- Facing the increasing needs of a fast growing company, with challenging users (games developers), I formulated, defined and implemented company's new corporate network (IP VPN). This unique network architecture reduced IT maintenance costs while providing a new level of performances and reliability.

## CORE BUSINESS COMPETENCIES

- Skilled Professional with over twelve years experience in the Information Technology field.
- Strong communication and organizational skills acquired in a multinational company.
- Proven ability to implement technology-based solutions for business problems. Developed policies and procedures for cost reduction and improved efficiencies.
- Systems Design – IT Security – Strategic Planning – Linux Expert

## PROFESSIONAL EXPERIENCE
